

# Arvin Saguisa

4 years

Degree in Information Technology

## EXPERTISE

- **Programming Languages:** Java, C#, Python
- **Manual Testing:** Hands-on experience in executing manual test cases and identifying defects
- **Tools:** Knowledge in Git (version control) and Postman
- **Test Methodologies:** Understanding of Agile and Scrum methodologies

## SKILLS

- **Adaptability:** Comfortable adjusting to new tools, technologies, and environments.
- **Collaboration:** Strong teamwork and communication skills
- **Project Management:** Proficient in using project management tools such as ClickUp for task tracking and project coordination.

## SUMMARY

Results-driven Software Test Engineer with a strong background in quality assurance and a passion for delivering reliable software solutions. Committed to continuous learning and improvement, I thrive in collaborative environments where precision and efficiency drive success.

## EXPERIENCE

### Software Quality Assurance Tester

#### Personal Information Management App

- Conducted functional testing to ensure proper data storage and retrieval of user contact information.
- Collaborated with the development team to report bugs and verify bug fixes during iterative testing cycles.

#### Resort and Activity Management App

- Conducted functional testing to ensure the accuracy and consistency of resort activity listings, maps, and rules.
- Performed compatibility testing across different devices and platforms (iOS/Android).

#### Ride Hailing App

- Conducted manual and end-to-end API testing, validating ride booking, and driver dispatch workflows.
- Tested WebSocket connections for real-time driver-passenger communication and tracking.

#### E-commerce Platform

- Tested bulk product imports, validating data mapping, error handling, and unit conversions.

### Web Developer

#### Websites & Online Marketing for Dental & Medical

- Customized website templates for dental and medical clients
