SUMMARY

Dedicated Software Test Engineer with a passion for continuous learning and a drive to stay competitive in the tech industry. I am committed to expanding my knowledge and skills to deliver high-quality software and contribute to the success of each project I work on.

EXPERIENCE

Software Quality Assurance Tester

E-learning App

- Collaborated in testing the app to identify bugs and provide detailed reports to the client.
- Worked with developers to resolve issues and validate bug fixes.

Personal Information Management App

- Conducted functional testing to ensure proper data storage and retrieval of user contact information.
- Tested the user interface for ease of navigation and user-friendly design.
- Collaborated with the development team to report bugs and verify bug fixes during iterative testing cycles.

Resort and Activity Management App

- Conducted functional testing to ensure the accuracy and consistency of resort activity listings, maps, and rules.
- Performed compatibility testing across different devices and platforms (iOS/Android).
- Collaborated with developers to identify, report, and track bugs throughout the testing cycles.

Web Developer
Websites & Online Marketing for Dental & Medical

- Developed custom website templates for dental and medical clients
